

MG Series

Automatic Cutting Plotter With Registration Mark Sensing System

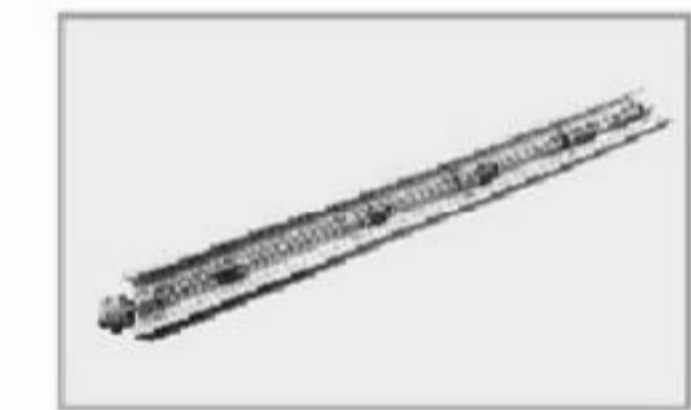

Low working noise

64MB memory

High speed

High precision
integrated guide rail

Wifi(optional)

Network (optional)

High precision

Wider cutting applications

Automatically detect and design the cutting route instead of manual operation, which is time-saving and avoid media waste because of sending wrong data. Automatically detect the direction of media feeding and accordingly adjust the cutting route to avoid wrong cutting when media is loaded differently.

Electronic die cutting

Hollowing art

Interior decoration

Sandblasting lacquer
